# Domiciliary Care

# How can CRG Homecare's Care Assistants help me?

## Our purpose

Homecare enables people to remain independent by living in their own home. From personal care, household duties and preparing food our care assistants provide a helping hand around your home.

Domiciliary care is aimed at people who can still live in their own home but need extra support with daily tasks to remain independence.

Any individual, at any stage of life, could require domiciliary care including those with physical disabilities, learning disabilities and/or mental health problems.

## Services

Our Care Assistants can support you by:

-  Preparing food
-  Completing household duties
-  Personal care such as showering & washing
-  Accompanying you in the community e.g. shopping
-  Administering medication

## Len's Story

“I have two of the most devoted carers I could ever wish for; they are fantastic.”

compassion

courage

care

commitment

communication

competence

# Person Centred

## care

Person-centred care is at the heart of everything we do. We encourage every individual to identify what is important to them and what they would like to achieve.

Before CRG Homecare starts to provide your care, our Care Supervisors will visit you to complete a Care Needs Assessment. Our Care Supervisor will get to know you and understand what help you require so we can put together a personalised care plan.

Dependent on your requirements, CRG Homecare can provide daily or weekly care visits tailored to your needs and this may alter as your needs change. The lengths of the care visits vary dependent on what tasks need completing during each care visit.

If you receive care from a relative or friend, we also provide respite care. This enables your care to take a break whilst you receive care by one of our Care Assistants. We also offer a sit in service, so our Care Assistant can stay with you for a few hours or if your carer is away on holiday, our Care Assistants are on hand to provide short stay care.
